Joel S. Hirschhorn

## Preamble

A warning is appropriate. Reading this article with a large amount of medical science information will likely increase your anxiety and fear. The views of many distinguished medical experts paint a bleak view of COVID vaccines. The likely reaction to the science is very different than the fear constantly propagated by the evil Dr. Fauci and his supporters. Here is the difference: They want you to fear the COVID virus and to accept vaccination, masking, lockdowns, school closings, and other forms of medical tyranny. With extensive data and expert assessments, this manifesto defines a vaccine dystopia. It is a terrible condition where fear of the virus is replaced by fear of the vaccines – supposedly the remedy for the virus. This manifesto supports a different solution to the virus: Give

personal medical freedom – your right to determine what medicine and vaccine to put into your body, not the government, especially when the government has a biased, one-sided view of vaccine safety.

## **Introduction**

We are at the edge of history, in a global society where there is great suffering and injustice because of the widespread commitment to getting the entire population jabbed with COVID vaccines that the government claims are safe. As shown below, in truth there is ever-increasing deaths and harmful health impacts from all the COVID vaccines. But governments do not give credence to the many awful health impacts of the vaccines, no matter how many esteemed physicians and medical researchers present evidence for stopping vaccination efforts.

The political and medical establishments keep using the same insensitive argument. No matter how many people die from the vaccines – often within days of getting jabbed – those in power proclaim that more lives are saved from using the vaccines against COVID than are lost due to them. So many thousands of people worldwide have died from the jabs, probably 100,000 or more based on data from CDC, the European Union, and other nations. But negative vaccine impacts are largely ignored by big media, the public health system, and authoritarian politicians. Sneaking into the public limelight are some famous people dying from the shots from the realms of sports, entertainment, and politics. But these are easily forgotten or ignored. Or seen as exceptions, statistically speaking.

In our quickly evolving vaccine dystopia, the vaccinated are granted many rewards and the unvaccinated are shamed, castigated, and bullied. We have not yet reached the critical inflection point where the many medical voices against vaccines (given below) prevail. Their voices are suppressed by big media; their medical science arguments and data are ignored. The result is that most of the population remains victims and slaves to massive propaganda about the benefits of vaccines. Ignored are not only the ill vaccine effects but also the enormous financial benefits obtained by makers of vaccines. Medical experts are unable to win the battle despite their science-based critiques of the vaccines. Yet what else can they do than to keep offering their expert medical advice?

Insanity is often defined as maintaining behavior that is proven wrong, destructive, and unhealthy. In our nascent vaccine dystopia, those with power keep pushing more vaccinations even as the death toll and harmful health impacts keep mounting. and vaccine effectiveness shrinks. Keep pushing

Perhaps over time vaccine-induced deaths and serious adverse health impacts will become so visible that the powerful vaccine machine will grind to a halt. Why? Because authoritarian and dystopian societies eventually collapse. However, only after incredible numbers of people have died and suffered. The many anti-vaccine medical experts cited below will have little pleasure from being ignored and criticized for so long only, eventually, to be seen as correct. Some kind of revolution is needed to overturn the multi-pronged vaccine empire.

Below are data, scientific judgements, and new studies and analyses that present compelling evidence against mass COVID vaccination. This is all we can do right now to fight vaccine dystopia and nourish the needed revolution.

## **New analysis of all major vaccines**

Physician J. Bart Classen published an extremely valuable analysis. He examined clinical trial data from all three of the major vaccine makers and found their vaccines cause more harm than good. Here are highlights from his article.

Data were “reanalyzed using ‘all cause severe morbidity,’ a scientific measure of health, as the primary endpoint. ‘All cause severe morbidity’ in the treatment group and control group was calculated by adding all severe events reported in the clinical trials. Severe events included both severe infections with COVID-19 and all other severe adverse events in the treatment arm and control arm respectively. This analysis gives a reduction in severe COVID-19 infections the same weight as adverse events of equivalent severity. Results prove that none of the vaccines provide a health benefit and all pivotal trials show a statistically significant increase in ‘all cause severe morbidity’ in the vaccinated group compared to the placebo group.”

In other words, he found that each of the vaccines caused more severe events in the immunized group than in the control group. No safety.

This was his main conclusion: “Based on this data it is all but a certainty that mass COVID-19

So many actions are pure fraud, designed to deceive the public and push a media story that makes unvaccinated people look bad.

The trick used by CDC that was revealed in some publications, but not big media, is to count the deaths of fully vaccinated people as unvaccinated if the deaths occurred within 14 days of their final vaccination.

Their goal was to make unvaccinated people look like pandemic culprits causing the continued spread of COVID. Indeed, what big media did produce to influence public opinion was that unvaccinated people were the problem. All this to help convince more people to get vaccinated.

In truth, the medical reality is that vaccinated people are dying for two reasons. Some are inflicted with serious health impacts from the vaccines themselves, such as blood clots that kill people from strokes and other maladies. Second, many are victims of breakthrough COVID infections that can cause death because vaccines over time become increasingly ineffective in protecting against COVID.

One astute critic said this: "This means if someone was hospitalized, admitted to ICU, required mechanical ventilation or died within two weeks of getting the jab they are being counted as 'unvaccinated,'" said Kelen McBreen. "The entire [CDC] report can basically be tossed into the trash thanks to the inclusion of the recently vaccinated in the unvaccinated category," wrote McBreen. "This intentionally misleading data is now being used to infringe on the rights of the people of California and across the entire United States as vaccine mandates and passports are being rolled out nationwide."

To add more context to what CDC has done, consider the following report of a revelation by a whistleblower.

In sworn testimony, she claimed to have proof that 45,000 Americans have died within three days of

After verifying data from the CDC's adverse reaction tracking system VAERS, the whistleblower focused only on individuals who died within three days of receiving their shot.

"It is my professional estimate that VAERS (the Vaccine Adverse Event Reporting System) database, while extremely useful, is under-reported by a conservative factor of at least 5," she added. She came to that conclusion by examining the Medicare and Medicaid data in respect to those who died within three days of vaccination

It should be noted that some years ago a Harvard study found that the system could be undercounting by a factor of 10 to 100.

Her statement also made an important point regarding how the COVID pandemic is not being managed the way previous vaccines have been treated. "Put in perspective, the swine flu vaccine was taken off the market which only resulted in 53 deaths," said the statement.

EXAMPLE OF WHY 12 -DAY CDC PRACTICE IS FRAUDULENT: Back in January there was a news story about the death of 56-year old Florida doctor Gregory Michael who died from a rare autoimmune disorder developed on December 21 three days after receiving the Pfizer vaccine. His wife said that in her mind his death was 100% linked to the vaccine. One doctor came forward publicly to say he also believed the vaccine caused the victim to develop acute idiopathic thrombocytopenic purpura (ITP), the blood disorder, and brain hemorrhage that killed him. Dr. Jerry L. Spivak, an expert on blood disorders at Johns Hopkins University, who was not involved in Dr. Michael's care, said "I think it is a medical certainty that the vaccine was related. It happened and it could happen again." His medical reasons were that the disorder came on quickly after the shot, and "was so severe that it made his platelet count 'rocket' down." Over the following months, huge amounts of medical research documented vaccine-induced blood problems, including the one that

unvaccinated.”

There is still more corruption to acknowledge.

In 2020 CDC issued new instructions for medical examiners, coroners and physicians to give more credit for COVID as the cause of death. Pre-existing conditions or comorbidities were to be recorded in Part II rather than Part I of death certificates. This was a major rule change from the 2003 handbooks to be used for reporting deaths. This single change resulted in significant inflation of COVID-19 fatalities by instructing that COVID-19 be listed in Part I of death certificates as a definitive cause of death regardless of confirmatory evidence, rather than listed in Part II as a contributor to death in the presence of pre-existing conditions, as would have been done using the 2003 guidelines. The result was significant inflation in COVID fatality totals by as much as 1600% above what they would be had the CDC used the 2003 handbooks. It comes down to what many people now understand, namely so many people die with COVID but not FROM COVID.

As a final example of data corruption and shortcomings, consider what was revealed at a recent meeting of nurses. They explained what they are facing in their hospital work, which also helps explain why so many nurses and physicians have refused vaccination. One nurse said she ran an ER department, and that it was tragic that they were seeing so many heart attacks and strokes, and that it is obvious that they are related to the COVID-19 shots. Another nurse stated that she was never trained about how to submit a report to VAERS about vaccine adverse events, and did not even know it existed until she did some research on her own. She said there is pressure to NOT report vaccine injuries and deaths, and it takes about 30 minutes to fill out the report, which few will do.

In our blossoming vaccine dystopia you cannot trust information coming from big media

To get the death rate you divide the number of deaths by the total number of infection cases. That gives a death rate of .86 percent among the vaccinated and .17 percent among the unvaccinated.

That is an amazing difference. **The death rate among vaccinated was just over five times greater than that for the unvaccinated.**

Five times greater! In other words, unvaccinated people who got infected were enormously safer from death. Proving that COVID vaccines are not safe.

How can we explain this huge difference in terms of medical science?

It should also be noted that it was determined that the measured viral load in both groups was the same. So, why are vaccinated people dying more frequently than the unvaccinated? Here are some plausible explanations.

First, there is something very dangerous and unsafe in the COVID vaccines associated with spike proteins that are causing people to die at a higher rate. For example, as discussed elsewhere, all current vaccines have been associated with serious blood problems, notably both large and microscopic blood clots. Many people have died from brain bleeds and strokes, for example. There are also many, many other types of adverse side effects causing a host of medical problems.

vaccines do not destroy the virus, nor prevent transmitting it to others. Some breakthrough infections are lethal.

Putting aside problems with CDC data, the death rate found in the UK for vaccinated people translates to about 1,300 deaths for vaccinated Americans. Indeed, an August report revealed that new CDC data indicated 1,507 people of those fully vaccinated died. It seems like these figures are only for breakthrough infection deaths because the CDC VAERS database indicates more than 6,000 vaccine deaths (through August 27) that are reported as vaccine adverse effects. [But nearly 14,000 deaths apparently when non-US data are included.]

A higher death rate from COVID for vaccinated people in the US compared to other countries might be related to a generally unhealthier population with more serious health conditions, notably high levels of obesity.

Just days ago, it was reported that West Virginia saw a 25% increase in deaths of people that are fully vaccinated over the last eight weeks. At the same time, it was reported that in Massachusetts 144 people fully vaccinated also died from COVID, an 80 percent increase from several weeks earlier, and that new total translates to about 4,800 for the whole nation. In New Jersey, there was a 16 percent increase in breakthrough deaths recently.

Add these results from research in Israel: People who were vaccinated in January and February were, in June, July, and the first half of August, six to 13 times more likely to get infected than unvaccinated people who were previously infected with the coronavirus; that is, people with natural immunity. In one analysis, comparing more than 32,000 people in the health system, the risk of developing symptomatic COVID-19 was 27 times higher among the vaccinated, and the risk of hospitalization was eight times higher.

In Scotland, official data on hospitalizations and deaths show 87% of those who have died from COVID-19 in the third wave that began in early July were vaccinated.

In Ireland, 18 percent of COVID deaths were in fully vaccinated people.

There is only one rational conclusion from examining all the foreign data: COVID vaccines are both unsafe and ineffective.

**Great article on vaccine failure**

mRNA and vector vaccines against SARS-2 are no different. They had some success when they were first rolled out, but if anything that probably made things worse."

"Our universal vaccination campaigns worked just well enough to speed up the evolutionary processes that are always and everywhere optimizing Corona." That means the virus keeps outwitting us.

"It is impossible to believe that this failure was not foreseen. The scientists who developed the vaccines knew for sure how things would play out. That's why they concluded the trials after three or four months and vaccinated their controls. It's why they have been talking about boosters from the very beginning. It's why, if you listened carefully, you never heard Zero Covid sloganeering coming from Team Vaccine. Only the comparative morons on Team Lockdown ever talked like that."

"Our politicians and our new public health dictators, on the other hand, remained oblivious to the limited potential of the vaccines. They continue to insist on universal vaccination and green passes, while it is obvious that these will do nothing to influence the course of the pandemic."

“When do the powers that be start focusing on TREATMENTS for those who contract covid, regardless of vaccination status?? No other infection, condition, disease, etc doesn’t have treatment options, except for covid....they, the powers that be, go so far as to block treatment options or make them incredibly hard to get. It’s past time to make the various treatments readily available...they don’t have to be 100% successful, but we should be given the choice to try them!!”

## **Vaccine dystopia seen by some esteemed scientists**

If the material above has made you depressed, you may not want to keep reading. Some great medical scientists have gone public with very negative views of the future because of mass COVID vaccine use.

Chief among these forecasters of vaccine doom is Dr. Judy Mikovits. She became widely seen as a

body will cause an auto-immune attack with terrible consequences for our health and even death. He made this statement:

“The big, big danger about this vaccine is you are shooting the gene of the virus into your body. It is going to go through the body and go to entering cells that you don’t know. These cells are going to start making, not the whole virus, but virus protein, and these cells are going to put the waste of that spike protein in front of their cells. And the killer lymphocytes will see the waste, and, you know, anyone who does not understand there is going to be an autoimmune attack because the killer lymphocytes are already there. It is with this that I will say, “Bye bye,” (death) because you don’t realize what you are going to do. You are going to plant the seed of autoimmune reactions.”

Dr. Sherri Tennenny is board certified in emergency medicine and osteopathic manipulative medicine

program as an unacceptable mistake and is a scientific error as well as a medical error. His assertion is that "The history books will show that...it is the vaccination that is creating the variants." In other words: "There are antibodies, created by the vaccine," forcing the virus to "find another solution" or die. This is where the variants are created. It is the variants that "are a production and result from the vaccination." He is talking about the mutation and strengthening of the virus from a phenomenon known as Antibody-Dependent Enhancement (ADE). ADE is a mechanism that increases the ability of a virus to enter cells and cause a worsening of the disease. His bottom line: "Faced with an unpredictable future, it is better to abstain." But most people will find it extremely difficult to resist all the coercion and vaccine mandates. As to the much talked about and hope for herd immunity, he has said: "the vaccines Pfizer, Moderna, Astra Zeneca do not prevent the transmission of the virus person-to-person and the vaccinated are just as

safe. She holds a doctorate in biochemistry and molecular biology from the University of Texas, and has over 30 years of scientific experience, primarily in toxicology and mechanistic biology. "I strongly feel that all the gene therapy vaccines must be halted immediately due to safety concerns on several fronts," she said. Also noted was that "Covid vaccines could induce cross-reactive antibodies to syncytin [a protein], and impair fertility as well as pregnancy outcomes." Yet another issue was this: "there is strong evidence for immune escape, and that inoculation under pandemic pressure with these leaky vaccines is driving the creation of more lethal mutants that are both newly infecting a younger age demographic, and causing more Covid-related deaths across the population than would have occurred without intervention. That is, there is evidence that the vaccines are

“Despite calls for caution, the risks of SARS-CoV-2 vaccination have been minimized or ignored by health organizations and government authorities.”

“In the context of these concerns, we propose halting mass-vaccination and opening an urgent pluralistic, critical, and scientifically-based dialogue on SARS-CoV-2 vaccination among scientists,

vaccine shots are unnecessary and potentially dangerous.

All COVID vaccine decisions are difficult. How informed are people really? Is consent just a mindless
